Comments:	<p>A centre like this is always best at the motorway junction rather than within the town boundary. BUT this is a RURAL area, not an industrial town, so, if we have to have it, hide it with low buildings & high green banks around it.</p> <p>My other concern is the B4122 traffic. Currently due to the Recycling Centre & the Hideaway pitstop, there is already heavy congestion back to the M4.</p> <p>From the proposed new entrance roundabout to the M4 would need widening. In the other direction from the new roundabout, perhaps a filter lane for lorries to travel into Hideaway OR put the recycling hours back to last years 7 days +evenings.</p> <p>Bottom Line-- traffic in BOTH directions increasing/congestion added to the visual impact on country side.</p>
