Comments:	<p>The scale of this development is totally out of keeping with the local rural surroundings. All of the residents who live locally chose to live in the Chippenham area because it does not have developments of this scale. The local facilities (roads, refuse collection, utilities etc) are not built to sustain a development of this size. And they should not be, because the local area is a rural one. Dyson will already bring substantial amounts of extra traffic to J17. We do not need a development of this size here. I strongly object.</p>
