Comments:	<p>This appears to be a huge development project which doesn't seem to have been the subject of any serious discussion or consultation within the community. This is not in accordance with Government planning policy or 'ethos of localism'.</p> <p>As a frequent user of the nearby Household Recycling Centre, I have become increasingly aware of the increased traffic flow in recent years, and the potential danger from articulated lorries weaving through the queue of cars and trailers in order to gain access to the nearby café.</p> <p>Together with the imminent (and welcome) redevelopment of Hullavington by Dyson, regardless of the proposed traffic lights, it is likely that the existing Junction 17 will be unable to cope with substantially more traffic; has consideration been given to the possibility that there may have to be a costly redesign of this Junction similar to that being carried out at Junction 16?</p>
