Application No	17/03417/OUT
Comments	<p>I wish to put forward an objection to this application. I am in Unit 6 Westbrook Farm and I feel the impact this huge development will have on the area would be disastrous. The B4069 is already an extremely dangerous road. It is heavily used every day and I regularly encounter near misses with lorries coming out of the Pit Stop and cars queueing to use the Recycling Centre when either entering or leaving. This road would never cope with the additional volume of traffic such a huge development would create. It would generate a massive amount of additional traffic wishing to use the M4 roundabout, this is already extremely dangerous at busy times. My wife regularly uses the A350 out of Chippenham in the morning to travel to Swindon on the M4 and it is not unusual for her to queue back to Kington Langley to get onto the M4 roundabout and again at night she queues onto the M4 which she says is terrifying sat in a stationary vehicle. HGV vehicles would use the Pit Stop for fuel so this would create even more danger with such vehicles entering and leaving these premises. A development of this size would create a large amount of employment from the Chippenham and surrounding areas and the road infrastructure is simply not there to accommodate it. I am not opposing development of the site if it were on a smaller scale but what is proposed I believe would be a danger to local people.</p>
