ICES

Dear Sirs.

Re. Chippenham Gateway Jct 17

OBJECT.

I wish to express my strong objections to the above plan.

The extra heavy traffic which such a development would create would make a profound impact on the roads in the area, particularly Kington Langley. The noise, air pollution, danger and extra wear on the already badly maintained roads.

Junction 17 is already a point of chaos at busy times, this development would potentially bring traffic on the M4 to a standstill, the dangers of that hardly need spelling out.

The plan contravenes much of the Wiltshire Core Strategy.

There can be little economic justification

for this development as we all know, such large storage/distribution plants are automated so jobs potential would be small.

I understand the builders claim to be doing a speculative development. May I remind them that several such sites including a huge one on the edge of Strindan remain empty - why do we need more?

Finally, I understand that three plans are ready. The one we are talking about, one smaller and one even smaller still. No doubt the thinking is that if the larger one is turned down, Walskine Council and users here in the affected area will be so stupid as to be grateful to pass the smaller one.

Yours faithfully

(Mrs)
