10-5-17.

Planning application 17/03417/OUT.

Dear Sir,

I would like to object to the above planning application.

A distribution warehouse as large as planned will cause many problems for local people with the amount of lorries in and out of the site. Even with a round-a-bout there will be many holdups at peak times.

I am very concerned about the amount of rainfall, especially after hard storms that will find its way into the Draycott brook, which runs through S. Berger to the River Avon. There has been culverts put beside the bridge on Seagry Rd, to help with the flood water, this still ~~has~~ has to be proved to be efficient. Having lived along side of the brook for 54 years, we know how quickly the flood water rises, & think that the brook could take no more without flooding.

Planning Application 17/03417/OUT.

Dear Sir,

I would like to object to the above planning application.

A distribution Warehouse as large as planned will cause many problems for local people with the amount of lorries in and out of the site. Even with a round about there will many holdups at peak times.

I am very concerned about the amount of rainfall, especially after hard storms that will find it's way into the Dragott Brook, which runs through Sutton Bengor to the river Avon. There has been culverts put beside the bridge on the Seagy rd., to help with the flood water, this still has to be proved to be efficient.

Having lived along side the brook for 54 years, I know how quickly the flood water rises, & think that the brook could take no more water without flooding.

Mr J.C. CLARKE M.B.E.
