Comments:	<p>My key objection is that this development is in a location not identified for development as detailed in the democratically approved Malmesbury Neighborhood Plan.</p> <p>It is on high ground above the 85 ft contour that would affect the vista that the area has of the historic Malmesbury Abbey. A key tourist enabler for the local economy.</p> <p>In addition, the fields are vital soakaways for a town frequently effected by flooding.</p> <p>Finally, I have concerns about the increase in traffic along a road that already has significant new housing development and an increase in traffic associated with the recent Dyson expansion.</p>
