Dear Planning

Concerning the above application [and indeed others applied for such as backridge], it is dismaying that WC are not taking the lack of support for these huge, unsustainable housing projects that will have a negative affect on the town infrastructure and support.

The local plan as approved by WC was for a set number of new housing to be built up to 2026 but, with only half the period passed, the total number of houses for the 20 year period is close to being approved by 2017! Additionally, the strain on schooling for example is now at a stage where 'expansion' is not sufficient unless it is a large scale expansion of both primary and secondary schooling or indeed a new school.

Its seems futile, but what is the point of canvassing local consultation and having a neighbourhood plan if it is ignored for the benefit of large building companies.
