Comments:	<p>I am not going to object to this proposal as the new stone structure looks well thought through and in keeping with the original Knighton Mill. The glass structure does seem a little large though</p> <p>As a close neighbour and owner of the Grade 2 listed Manor house my main concern is regarding the demolition and construction of the new property as this is a major work and a huge size.</p> <p>If working hours could be strictly adhered to and no working at weekends . Also a management plan for the tidy disposal of waste and then the arrival of the new materials. If there could be minimum disruption to traffic and the work completed as swiftly as possible that would be a help.</p> <p>It would be good to see the plans for this so we know what to expect and make sure it is adhered to.</p> <p>Then on completion the making good of all neighbours verges, tracks and any other damage.</p> <p>Hopefully on completion the site will retain its peaceful location and without floodlights etc</p> <p>The owner has spoken to myself and has assured me of his willingness to minimise our disturbance</p>
