	<p>I understand the consultation period has been extended in relation to this sensitive application. (17/08735/FUL)</p> <p>I would object to this application as it will if granted change the character of the village in this sensitive location. The site currently offers country-side views from the listed and protected All Saints Church.</p> <p>My understanding is that the County Planning policy is to protect villages from over development. This proposed development is not an infill site and if granted would change significantly the development area of the village.</p> <p>The proposed play area sounds rather like an incentive to approve the plan. The play area would be too adjacent to a very busy road and certainly not in keeping with the conservation area. There are other play areas in the village already which are more appropriate.</p> <p>The entrance to the site will mean another road across an already too narrow pathway used by the children going to the school.</p> <p>The application is therefore not appropriate for this sensitive location and should be rejected.</p>
