Comments:	<p>The proposal will require major redevelopment / rebuild in order for the application to suit the intended purpose.</p> <p>The application proposal will have a considerably larger footprint than the original building. The building has had several additions which are not part of the original structure. These are constructed of mainly corrugated iron, temporary and clearly not part of the original building.</p> <p>Access to the site is on a stretch of road with a bend in the road resulting in limited visibility of passing traffic.</p> <p>I believe the application to be untrue. The building has not be redundant as I have personally witnessed that it was in use in 2015 and 2016 for housing sheep.</p>
