Application No	17/12491/FUL
Comments	<p>With regard to the planning application 17/12491/FUL, I am very concerned that this proposed development within a conservation area does not meet the criteria laid down in the Keevil Village Design Statement. This clearly states that existing boundary walls and hedges are important features throughout the length of Main Street and should be retained. It also states that open spaces or gaps, which make a significant contribution to the character and appearance of the street scene, should be protected.</p> <p>The site is inadequate for the two 3/4 bedroom houses proposed and the design is not in keeping with neighbouring properties.</p> <p>Finally, the problem recently highlighted due to parents parking at the school will only be exacerbated by two new dwellings with limited off street parking.</p>
