Church Farm Planning Application.

I write as someone who loves this village and has lived here for nigh on forty years. My own house is not a thing of beauty, but it has space around it and is set back on the site.

The proposed development would: -

- a) block the views to the church
- b) look very odd - squeezed in between two much older houses on each side, and opposite.

I am sure that you will consider this application very carefully, because it would be relatively easy to change the nature of a village which is looking particularly beautiful now with all the snowdrops out!

Yours faithfully,
