Application No	18/04656/FUL
Comments	<p>I strongly object to the planning application to build houses on a Greenland site this is an ancient woodland within a conservation area Fruit trees that are 150 years old and an abundance of wildlife and flowers</p> <p>To have any form of building on this site we have a huge damaging affect on the biodiversity in this area not to mention the environmental impacts of traffic noise pollution . I would like to say that I have no objections to the former school being converted into flats and preserving this fantastic building</p>
