Application No	18/04656/FUL
Comments	<p>Trowbridge museum went for this site as an ideal place to house, and expand, their museum - the council did everything within their power to get the application refused. this building is of historic importance and more and more of our counties heritage is being destroyed by developers who only see the £ sign. Trees are also being destroyed for no reason and houses built on the land - with no thought to the wildlife that depends on the trees and land.</p> <p>it's about time witshire council were made to realise that money isn't everything and that once you destroy historic buildings and/or sites - they are lost forever.</p> <p>i strongly object to this proposal and urge the council to throw this application in the bin where it belongs.</p>
