Application No	18/04656/FUL
Comments	<p>concerned about the loss of trees within the application area along with an apparent lack of Nature Conservation. The negative effect on the setting of a Grade 2* listed building within the Conservation Area makes this application repugnant.</p> <p>With regards to Archaeology, this site has a sunken Italian-style garden with stone Roman Casket, the removal of which from the community domain, alone suggests that this application be denied. I'm afraid that over-development or overcrowding of the site - particularly when the proposal is out of character in the area, would create adverse conditions for the proposed residents.</p> <p>I'm further concerned that a negative or adverse visual impact will be created by the development - particularly on the landscape and locality, such as the effect on the local park</p> <p>What about the adequacy of parking, loading and turning in a cul-de-sac road which is already struggling to cope with the current number of houses, GP surgery and pharmacy.</p> <p>Is Highway Safety of no concern here? What about the additional traffic generated by all the new residents? I'm worried about disabled persons' access because no special provision appears to have been made.</p>
