	<p>I am very concerned that the development will destroy the important heritage of Courtfield House and the Ancient Orchard.</p> <p>It is of course important that investment goes into the site before it deteriorated further as is clearly the current state and yes this investment is most likely and sadly from a whole site developer.</p> <p>That said with sensitive demarcation both the school, wool store and orchard could be retained in their current external appearance.</p> <p>The Orchard should be preserved with a no go perimeter from the development and proper access arranged from the Park. Further consideration should be given to the new owners within the new development contributing towards the ongoing maintenance of the orchard.</p>
