Application No:	18/04656/FUL
Comments:	<p>I notice on the Planning Application Form that the final question asks ' can the site be seen from a public road, public footpath, bridleway or other public land?' and the answer is 'NO'. I realise that, as residents, we have no right to a view, however I find it strange that the adjoining park on the entire west boundary, is not considered to be a public path. One of the buildings on that side is a three storey block of three flats. So, not only loss of trees and wild life habitat, increased pollution, traffic movements and strain on the surgery but a denial that no one will be able to see it.</p>
