Comments	<p>I feel that building on this land would be detrimental to the community as it is a local amenity. It would impact the grade 2 listed building and would be a huge loss for conservation, wildlife and natural habitat including the loss of trees. There would be an adverse visual impact of the development - particularly on the landscape, such as the effect on the local park.</p> <p>Parking is in a cul-de-sac road that is already struggling to cope with houses, GP surgery and pharmacy and the increase in traffic can only negatively influence the local area.</p>
