Comments:	<p>I would like to raise my concern of extra traffic in the lane with regard to this possible development. The lane already serves 15 properties with traffic that that generates to homes and farming businesses. Most properties in the lane have outbuildings or barns that could be developed. It is a narrow single track, No through road with several bends and nasty corners with only a few passing places, some of which aren't very good to use in the winter. Over the years this traffic has increased significantly on a lane that will need resurfacing in the future. The lane also floods up to 18" deep which leaves it impassable for a car for up to 24 hours.</p>
