Application No:	18/08304/FUL
Comments:	<p>To whom it may concerns</p> <p>I strongly object with this application 18/08304/FUL. This is the second time a application for houses has been put forward and got rejected thankfully</p> <p>The impact on residents within Saxon Rise with regards parking will have a large impact. The amount of vehicles within Saxon Rise is atrocious at the moment let alone with garages and parking facilities being taken away and not replaced. The parking facilities which are to the left of the garages/play park and lower parking areas were all subject to planning permission being grated for the Riverbourne development going ahead. So now Riverbourne is built you want to take this away. I don't see how you can take away something that was a condition of another development being built. I have photographic evidence of the parking situation which i can forward on. If an emergency vehicle had to attend anywhere up within Saxon Rise it would not beable due to lack of parking facilities.</p> <p>I know that most of the garages mentioned have vehicles within them so this will place more vehicle out within Saxon Rise. This will create more vehicles being parked on the pavements/grassed areas than there is already.</p> <p>Having a rented garage and know that there are non available within Saxon Rise, this will be taking away a facility already in use/being paid for. No offer of a replacement given.</p> <p>I do not see that this is a good idea for the application to go a head. Giving more parking with be a better than taking parking/garages away.</p> <p>Regards</p> <p>N Williams</p>
