Application No:	18/08304/FUL
Comments:	<p>Application number 18/08304/FUL.</p> <p>With regard to the above application for the demolition of 6 garages and building of 2 dwellings. While I have no objection to the building of extra housing, this will definitely have a major impact on the already overcrowded parking situation. This has been a problem for some time now, only made worse by the building of Riverbourne Road. Unfortunately when these properties were built not enough parking was provided for them so they consequently overspill on to</p> <p>Saxon Rise. From approx. 5pm when people return from work until the morning there are vehicles parked in the road, on verges and pavements and on occasion residents have had to park off of the estate. In the event of an emergency should someone require an ambulance or fire service these vehicles would find it very difficult to park within the vicinity of the property they needed to attend. This happened just recently when an ambulance was called, they could not park close to the property, they had to just stop in the road and attend the person in need. Subsequently while they were in attendance no vehicles could come or go as they were unable to pass, due to vehicles parked in the road and on the pavement.</p> <p>The other consideration is the safety of the children who play on the estate, with all these vehicles parked in the road etc the children cannot always be seen by vehicles coming and going on to the estate. It is an accident waiting to happen.</p> <p>With the proposed building of more properties the situation will only worsen.</p>
