Application No:	18/11052/FUL
	<p>This is a huge undertaking.</p> <p>Temporary would infer no footings for any buildings. This is not the truth.</p> <p>This is open land, frequently used by people.</p> <p>The applicants have clearly only been to the site when there is no MOD training....there are frequent days when this area is used by low flying aircraft, both from Boscombe Down trialling modifications on RAF fighter jets; and from military helicopters, both for dropping parachute regiment, and low level practise; plus landing and take off close by of the large transport planes.</p> <p>Additionally on major exercise days and nights the sound can be heard of gunfire, (large and small fire arms) and the tanks travelling in convoy.</p> <p>Go to France, their landmass is huge.</p>
